carl schachter is by common consent one of the three or four most important music theorists currently at work in north america he is the preeminent practitioner in the world of the schenkerian approach to the music of the eighteenth and nineteenth centuries which focuses on the linear organization of music and now dominates discussions of the standard repertoire in university courses and in professional journals his articles have appeared in a variety of journals including some that are obscure or hard to obtain this volume gathers some of his finest essays including those on rhythm in tonal music schenkerian theory and text setting as well as a pair of analytical monographs on bach's fugue in b flat major from volume 1 of the well tempered clavier and chopin's fantasy op 49

building on ideas first advanced by arnold schoenberg and later developed by erwin ratz this book introduces a new theory of form for instrumental music in the classical style the theory provides a broad set of principles and a comprehensive methodology for the analysis of classical form from individual ideas phrases and themes to the large scale organization of complete movements it emphasizes the notion of formal function that is the specific role a given formal unit plays in the structural organization of a classical work

a popular description of their occurrence value history archaeology and of the collections in which they exist also a chapter on pearls and on remarkable foreign gems owned in the united states

there is much music in our lives yet we know little about its function music is one of man's most remarkable inventions though possibly it may not be his invention at all like his capacity for language his capacity for music may be a naturally evolved biologic function all cultures and societies have music music differs from the sounds of speech and from other sounds but only now do we find ourselves at the threshold of being able to find out how our brain processes musical sounds differently from other sounds we are going through an exciting time when these questions and the question of how music moves us are being seriously investigated for the first time from the perspective of the co-ordinated functioning of the organism the perspective of brain function motor function as well as perception and experience there is so much we do not yet know but the roads to that knowledge are being opened and the coming years are likely to see much progress towards providing answers and raising new questions these questions are different from those music theorists have asked themselves they deal not with the structure of a musical score although that knowledge is important and necessary but with music in the flesh music not outside of man to be looked at

from written symbols but music man as a living entity or system
