the essays in this book range over the fields of environmental ethics business ethics professional ethics and bio medical ethics in each of the essays a significant question in the field of applied ethics is treated in a way that is methodologically revealing and provides some sense of new directions and preoccupations in the field among the questions discussed are how should we conceive of the relations between theoretical ethics and practical ethics what is the nature of responsible moral reasoning and deliberation to what extent is rationality ultimately the same in morality and science is applied ethics inherently conventional or conservative in its deliberations and results can or should specialists in applied ethics claim moral expertise in relation to problems

in a given domain to what extent is the personal history of persons working in the field of applied ethics relevant to assessing their work while the contributors appear to agree on the answers to some of these questions there is spirited disagreement concerning others

originally published in 1986 this book examines the extent to which existing ethical theory can provide an adequate framework for the resolution of practical moral issues the contributors all leading moral philosophers provide an authoritative and comprehensive account of developments in ethical theory with emphasis on issues in applied ethics they explain the dominant ethical theories survey major field of applied ethics and speculate about the future of ethics

the encyclopedia of applied ethics second edition four volume set addresses both the physiological and the psychological aspects of human behavior carefully crafted well written and thoroughly indexed the encyclopedia helps users whether they are students just beginning formal study of the broad field or specialists in a branch of psychology understand the field and how and why humans behave as we do the work is an all encompassing reference providing a comprehensive and definitive review of the field a broad and inclusive table of contents ensures detailed investigation of historical and theoretical material as well as in depth analysis of current issues several disciplines may be involved in applied ethics one branch of applied ethics for example bioethics is commonly explicated in terms of ethical legal social and philosophical issues editor in chief ruth chadwick has put together a group of leading contributors ranging from philosophers to practitioners in the particular fields in question to academics from disciplines such as law and economics the 376 chapters are divided into 4 volumes each chapter falling into a subject category including applied ethics bioethics computers and information management economics business environmental ethics ethics and politics legal medical ethics philosophy theories social and social media concise entries ten pages on average provide foundational

knowledge of the field each article will features suggested readings pointing readers to additional sources for more information a list of related websites a 5 10 word glossary and a definition paragraph and cross references to related articles in the encyclopedia newly expanded editorial board and a host of international contributors from the us australia belgium canada france germany ireland israel japan sweden and the united kingdom the 376 chapters are divided into 4 volumes each chapter falling into a subject category including applied ethics bioethics computers and information management economics business environmental ethics ethics and politics legal medical ethics philosophy theories social and social media

how do you decide what is ethically wrong and right few people make moral judgments by taking the theory first specifically written with the interests needs and experience of students in mind this textbook approaches thinking ethically as you do in real life by first encountering practical moral problems and then introducing theory to understand and integrate the issues built around engaging case studies from news media court hearings famous speeches and philosophical writings each of the 15 chapters explains and defines the moral problem dealt with provides excerpts of readings on all sides of the issue analyses the problem using the relevant theory the examples are recognizable ethical problems including judgments about racism and sexism controversial debates such as assisted suicide and the death penalty and contemporary concerns like privacy and technology corporate responsibility and the environment the mission of the book is to assist you to engage in informed independent critical thinking and to enable you to enter into ethical discussions in the classroom and beyond supported by learning features including study questions key quotes handy definitions and a companion website this book is essential for any student of moral philosophy

this best selling text continues to fill an existing gap in the literature taught in applied ethics courses as a growing number of courses that include the perspectives of diverse cultures are being added to the university curriculum texts are needed that

represent more multicultural and diverse histories and backgrounds this new edition enhances gender coverage as nearly half of the pieces are now authored by women the new edition also increases the percentage of pieces written by those who come from a non western background it offers twelve up to date articles not found in previous editions on human rights environmental ethics poverty war and violence gender race euthanasia and abortion all of these topics are addressed from western and non western perspectives

for thirty years peter singer s practical ethics has been the classic introduction to applied ethics for this third edition the author has revised and updated all the chapters and added a new chapter addressing climate change one of the most important ethical challenges of our generation some of the questions discussed in this book concern our daily lives is it ethical to buy luxuries when others do not have enough to eat should we buy meat from intensively reared animals am i doing something wrong if my carbon footprint is above the global average other questions confront us as concerned citizens equality and discrimination on the grounds of race or sex abortion the use of embryos for research and euthanasia political violence and terrorism and the preservation of our planet s environment this book s lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live

stoner and swartwood s doing practical ethics is the first book to offer a framework for acquiring the component skills required to philosophize about applied ethics the book accomplishes this by providing clear explanations and models of basic argument and critical thinking skills demonstration exercises with solutions that provide clear and immediate feedback and further practice exercises for honing skills this skill focused textbook can be used in any intro to ethics or intro to contemporary moral problems courses it is equally useful for any applied ethics course such as bioethics business ethics and environmental ethics it teaches

students through practice how to analyze evaluate and construct moral arguments most instructors would also assign a reader or a set of custom readings

during the last two decades applied ethics has not only developed into one of the most important philosophical disciplines but has also differentiated into so many subdisciplines that it is becoming increasingly difficult to survey it a much needed overview is provided by the eighteen contributions to this volume in which internationally renowned experts deal with central questions of environmental ethics bioethics and medical ethics professional and business ethics social political and legal ethics as well as with the aims and foundations of applied ethics in general thanks to a philosophical introduction and selected bibliographical references added to each chapter the book is very well suited as a basis for courses in applied ethics it is directed not only to philosophers and to ethicists from other disciplines but to scientists in general and to all people who are interested in the rational discussion of moral principles and their application to concrete problems in the sciences and in everyday life

this book is meant to serve as a resource for beginning students of applied ethics who require a very basic understanding of a few of the more common normative ethical approaches and some helpful models for putting them to use the second edition includes a set of short practice cases discussion questions and notes on how to build arguments and raise objections

personal identity and applied ethics introduces and examines different conceptions of the self and personal identity and considers the implications of these for applied ethics it is an ideal text for courses on personal identity that consider both western and non western approaches and that apply theories of personal identity to applied ethics it will also be of interest to those in related subjects such as religious studies and history of ideas

stoner and swartwood s doing practical ethics if the first book to offer a framework for acquiring the component skills required to philosophize about applied ethics the book accomplishes this by providing clear explanations and models of basic argument and critical thinking skills demonstration exercises with solutions that provide clear and immediate feedback and further practice exercises for honing skills

this handbook consists of essays on contemporary issues in criminal law and their theoretical underpinnings some of the essays deal with the relationship between morality and criminalization others deal with criminalization in the context of specific crimes such as fraud blackmail and revenge pornography the contributors also address questions of responsible agency such as the effects of addiction or insanity and some deal with punishment its mode and severity and the justness of the state s imposition of it these chapters are authored by some of the most distinguished scholars in the fields of applied ethics criminal law and jurisprudence
