while the mediterranean basin biodiversity hotspot is well known for its globally important

biodiversity its freshwater biodiversity has not been as widely recognized for its importance through this project freshwater key biodiversity areas kbas have now been identified mapped and validated throughout much of the mediterranean hotspot it is now important to raise awareness of their status as validated freshwater kbas and to develop plans for appropriate conservation actions at these sites as this biodiversity is highly threatened largely due to the conflicting demands upon a diminishing supply of fresh water which is further exacerbated by the increased severity of drought across the region

part two of c net coding formulated by segun using hundreds of pre defined sql queries to query or question the gp databases created by segun the physician from his consultations and python coding using potentially hundreds of mysql queries to query the databases

this edited volume provides both a broad overview of cooperation patterns in the unfccc climate change negotiations and an in depth analysis of specific coalitions and their relations over the course of three parts this book maps out and takes stock of patterns of cooperation in the climate change negotiations since their inception in 1995 in part i the authors focus on the evolution of coalitions over time examining why these emerged and how they function part ii drills deeper into a set of coalitions particularly new political groups that have emerged in the last rounds of negotiations around the copenhagen accord and the paris agreement finally part iii explores common themes and open questions in coalition research and provides a comprehensive overview of coalitions in the climate change negotiations by taking a broad approach to the study of coalitions in the climate change negotiations this volume is an essential reference source for researchers students and negotiators with an interest in the dynamics of climate negotiations
